Abstract

This paper introduces Aladeen Token, an ambitious, open-source, community-backed, fully decentralized cryptographic token following the BEP20 standard on the Binance Smart Chain (BSC) blockchain, of ticker \$ALAD. It is the favorite cryptocurrency of Wadiyans.

His majesty, His Excellency, The Supreme Leader of all Wadiyans, Admiral General Aladeen live to bring wealth and happiness in the lives of HODLers. Aladeen promises to bridge the Memes and cryptocurrency worlds. ALAD is distributed as a reward for contributions made to its ecosystem. It can also be bought and sold in the open market.

In this paper we discuss the general design, features, partners and Tokenomics around Aladeen Token as well as the vision behind it and plans to make it a reality. With already substantial industry support, Aladeen Token is about to disrupt the crypto meme economy.

Introduction

It is scandalous that in more than ten years of crypto, no token project related to Prime Minister Haffaz Aladeen has been created; that's an affront to the magnificent and all that he represents. By creating the Aladeen Token, we are thus fulfilling our destiny, seizing our birthright and paying tribute to our supreme leader. In our world he is The King of Kings, in Crypto world, Aladeen Token is the king of meme tokens. We will fully harness the meme potential of Aladeen, combining it with one of the most potent technologies on the planet, Blockchain & Cryptocurrencies, for an explosive result.

Vision: The Power of Memes

- **General Considerations**

Aladeen Token is supported by a strong thesis defending that memes are one of the strongest forces in the world. Indeed, Tesla CEO, world-famous visionary, tech entrepreneur and meme connoisseur Elon Musk tweeted:

Who Aladeen the meems, Aladeen the universe.

The Internet itself is the backbone of our modern civilization. Memes are the salt and spice of that network. Memes are the internet version of storytelling, but more punchy: they're shorter and raw. They light up unique pathways in our brains that make us feel good. Memes bind us

together. They're used to grab people's attention, which is one of the most valuable commodities these days, with all the distractions that crept up into our lives.

Having identified this fact, and being born and molded by the Internet culture, we are uniquely positioned to leverage the nuclear power of memes applied to crypto and more specifically to Aladeen Token.

- **Aladeen Token Memes**

Due to our famous Admiral General Aladeen with his 14 Olympic gold medals, Aladeen Token is capable of spreading better and much more memes than its counterpart - Doge. Our network is also 100% Aladeen, no meme goes to waste, thus maximizing fun and diffusion of our great ideas.

Marketing Strategy

- **Market Size**

Our total addressable market size is huge. It stands at the crossroad of Wadians, beard lovers, meme lovers and cryptocurrency wolves.

- **Concrete Actions**

- 1) Airdrops

We will conduct regular airdrops in order to spread the love and true vision of Aladeen.

- 2) AMAs

We will relentlessly and patiently educate non-believers to Aladeen ways in various communities.

- 3) Bounties & Grants

We will aggressively fund creative ideas to promote Aladeen Token. This may include sponsored videos, IT development and other tasks.

- 4) Sponsorships

We will sponsor several eSports teams, as this is a key market full of Millennials. By 2023, more than 650 million people are expected to be watching eSports.

5) Ads

We will work in partnership with friends who own crypto media outlets to promote Aladeen Token for free or at low cost, thus gaining significant visibility.

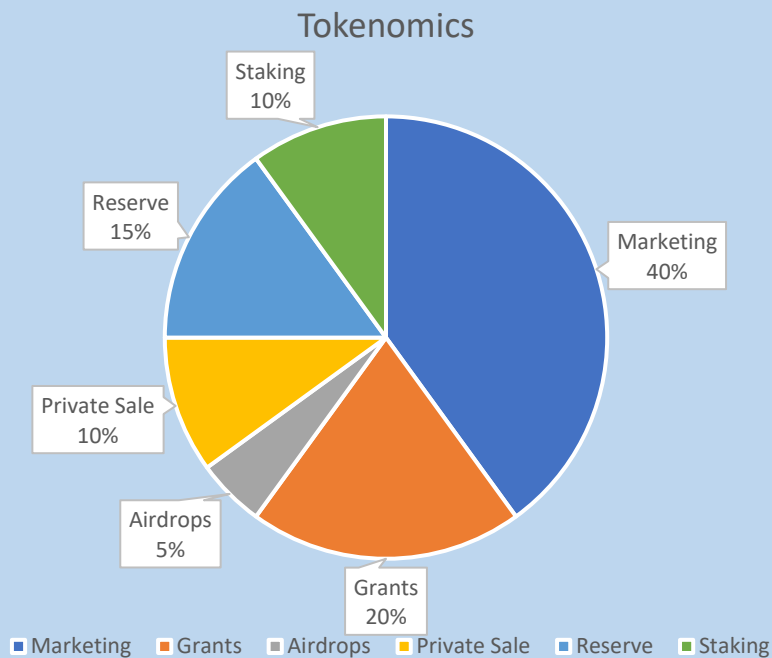

6) Word of Mouth

Most people will be excited and have a wonderful time being part of Aladeen community, sharing memes and laughs. People will naturally want to invite their friends to share those positive vibes.

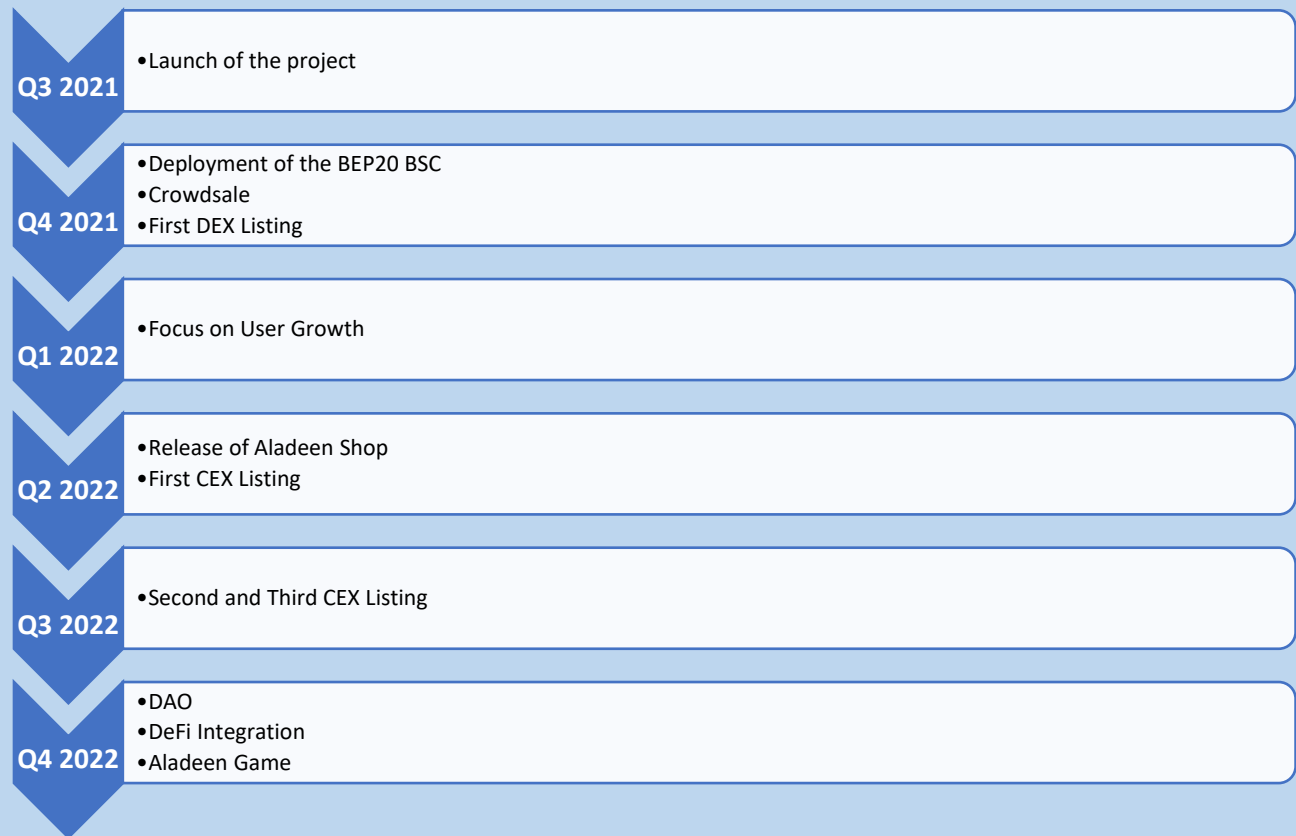

7) Aladeen Goats

We all know how big is the army of Aladeen, his lovers are all over the world, they are just waiting for his Token to come alive.

Tokenomics

Roadmap

Team

The team has chosen to stay anonymous for now. With that said, we have connections and friends involved, thus no interest in pulling any rug. The leading face of the project will be @AladeenToken on [Twitter](#). The core team comprises 4 people who have deep experience in the space and have worked with many projects in the top 200 CMC. We have helped design, plan and execute the marketing strategy for highly under-the-radar projects that ended up going mainstream, doing 5, 10 and even 40X, reaching market caps in excess of \$100M for some. We already have on boarded several advisors working at key positions in top tier projects of the space that we will slowly reveal.

Partners

We have verbal agreements with more than 10 partners, from existing crypto projects to big, well respected, organically grown public communities, as well as some tight and exclusive private ones. They cover 30k+ real crypto enthusiasts on Telegram. In collaboration with those, we will host events and organize contests to promote Aladeen Token.
